

Youth Venture of Central Iowa Presents:

Battle the Cavities:

A group of pre-dental and pre-medicine students at Drake University are on a mission to improve oral health of youth in the Des Moines metro area. Their passion for oral care helps fuel their desire to help underprivileged children who lack proper access and techniques for dental hygiene. Working to construct oral hygiene survival kits (which will include toothbrushes, floss and toothpaste), Battle the Cavities will give presentations to schools and youth programs. Through their efforts, Des Moines' metro area youth will have the healthiest smiles they've ever seen.
