

Come learn about geocaching! Bring your neighbors, your parents, and your kids!

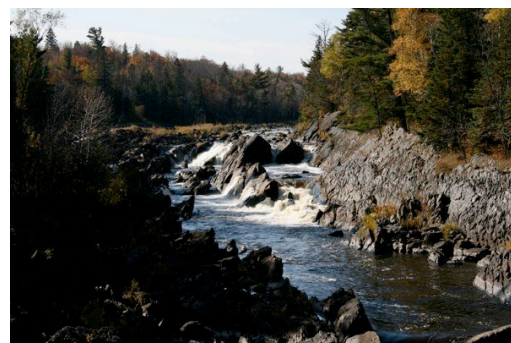

Geocaching is a high-tech treasure hunting game played throughout the world by adventure seekers with GPS devices. The basic idea is to locate hidden containers, called geocaches, outdoors and then share your experiences online. Geocaching is enjoyed by people from all age groups, with a strong sense of community and support for the environment.

Geocaching Introductory Workshop

Saturday, October 23 at 9:00 am
CYC Offices, 3826 1/2 Douglas Ave.

The workshop will be provided by Cindy Perry, a local geocacher who, with her husband, has found over 650 local caches and maintains one cache.

In this workshop, we'll explore the basics, including using a GPS unit, setting your own cache, and practice finding up to four special caches hidden around the CYC offices. We'll also do a little "Caching In, Trashing Out" while we are at it.

Fifteen GPS units will be on hand for you to use during the workshop thanks to Polk County Conservation. If you have a handheld unit, please bring it.

Geocaching is a fantastic activity for families, afterschool and residential programs, and school groups who want to practice math/geography skills, teamwork, get active, explore the community, and support the environment through the "Cache In, Trash Out" program.

Join us on Oct. 23 to get connected!

Registration is free and requested. Call CYC or email at amy@cyconcepts.org with the number in your party. Donations will be accepted and will be used towards purchasing GPS units that will be available for check-out from CYC.
